

## **Biosketch of Nicholas G. Hall**

Nicholas G. Hall is Professor of Management Sciences in the Fisher College of Business at The Ohio State University. He holds B.A., M.A. degrees in economics from the University of Cambridge, a professional qualification in accounting, and a Ph.D. (1986) from the University of California at Berkeley. His research interests are in operational supply chain issues, especially scheduling and pricing, and in applications of operations research to public policy problems. He is the author of over 70 refereed publications, and has given over 240 academic presentations, including 88 invited presentations in 20 countries, 6 conference keynote presentations and 6 INFORMS tutorials. He won the Faculty Research Award of the Fisher College of Business in 1998 and 2005. His teaching interest include project management, supply chain operations, decision modelling, and dynamic programming courses. He served as President of Manufacturing and Service Operations Management Society (1999–2000), and Vice President for Membership and Professional Recognition of INFORMS (2001–2003). He continues to serve on the editorial boards of the journals *Operations Research* (1991–) and *Management Science* (1993–). He has served on several INFORMS committees, including: Nicholson Prize (1997–1999), Finance (2001–2007), Practitioner and Practice Activities (2000) and Expository Writing (2007–2009), and organized six national and international conference clusters including 58 technical sessions. His research is currently funded by grants from the National Science Foundation and EPSRC (the national scientific funding agency of the U.K.). He is the owner and founder of a consulting company, CDOR, that serves the Ohio business and government communities.
