Intern $2,880/month

Undergraduate Ranking

Job Outlook for Logistics Management

• Employment of logisticians is projected to grow 2% from 2014 to 2024, slower than the average for all occupations.

• Employment growth will be driven by the important role logistics plays in the transportation of goods in a global economy. Growth will be moderated, however, because this occupation is concentrated in government and manufacturing, both of which are projected to decline.

• See the Occupational Outlook Handbook for additional information: http://www.bls.gov/oco/
Related Student Organizations

The Logistics Association
“To provide students with pivotal resources and exceptional opportunities which augment their knowledge of logistics and supply chain management. Our efforts construct a cohesive network of students and professionals that serves as a pipeline for our members to become the innovative leaders of tomorrow.”

Buckeye Operations Management Society (BOMS)
The Buckeye Operations Management Society (BOMS) is the student organization dedicated to the education and professional development of Fisher College of Business students in the field of Operations Management as well as a student chapter of APICS, the leading professional organization for Operations and Supply Chain Management. BOMS provides students the opportunity to network with professionals, peers, and faculty members in an informal setting. The organization aims to serve as the premier recruiting resource for companies seeking Fisher’s best operations students.
